

Noken13

Full-Stack Web Developer & Internal Tools Specialist

noken13-studio.vercel.app | github.com/noken13-jpg

Available for remote work (full-time or contract)

PROFESSIONAL SUMMARY

Web developer specializing in management information systems, internal administration platforms, and digital workflow automation. Experienced in designing relational databases, building dynamic analytical reporting modules, and automating the generation of official documents as PDF and web outputs.

Works independently, breaking down business problems into reliable software architecture. Combines solid engineering practice with efficient code to deliver clean, secure systems. Proactive, with strong asynchronous communication, and well suited to collaborating in distributed teams.

TECHNICAL SKILLS

Back-End & System Logic • PHP and RESTful API development • Authentication and Role-Based Access Control (RBAC) • Session and token management • Third-party service integration	Front-End & User Interface • HTML5, CSS3, and modern JavaScript • Responsive, mobile-ready interface design • Interactive analytical dashboards • DOM manipulation and async form validation
Database & Storage • MySQL / MariaDB architecture • Efficient relational schema design • Query optimization • Complex data relationship management	Systems & Workflow Automation • PDF export engines (HTML2PDF / Dompdf) • Git version control (GitHub / GitLab) • Web server administration (Linux and Windows) • Automated reports and official letters

KEY PROJECTS

1. Official Correspondence & Administration Information System

Workflow Automation

A unified web platform that digitizes bureaucratic workflows in government and corporate settings, covering the creation, numbering, and archiving of official documents such as Official Assignment Letters (SPT) and Official Travel Orders (SPPD).

- **Document automation:** automatic generator of print-ready PDF documents, with precise layouts that follow official margin and format standards.
- **Workflow management:** multi-level disposition and verification system across user roles (Admin, Verifier, Field Staff).
- **Efficiency impact:** cuts document preparation from hours to minutes and significantly reduces redundant employee data entry.

2. Social Welfare Data Management & Verification Portal

Data Processing & Dashboard

A web dashboard for managing data entry, cross-matching, and validation of integrated population data, helping ensure social assistance reaches the right recipients (inspired by SIKS-NG / DTKS workflows).

- **Bulk data module:** import and export of thousands of rows with automatic input sanitization to prevent duplicates and database errors.
- **Analytical visualization:** interactive dashboards that monitor demographic distribution and data verification status in real time.
- **Audit transparency:** user activity logging that records the history of data changes for accountability.

INDEPENDENT BUSINESS

Founder & Developer, Noken13 Studio

Web Development & Print Design

- Builds custom, mobile-friendly websites for cafes, online stores, and company profiles, with customer orders delivered directly to WhatsApp.
- Designs wedding print materials, for example X-banners, using the client's original photographs.
- Live site: noken13-studio.vercel.app

STRENGTHS FOR REMOTE WORK

- **Clear asynchronous communication:** tidy code documentation, clear written daily progress updates, and the ability to explain technical blockers to project managers without constant meetings.
- **Autonomy:** takes initiative in breaking down complex business problems into measurable technical solutions, without micromanagement.
- **Integrity and security:** careful handling of client databases, strict access-rights control, and protection of user data privacy.
- **Problem-solving focus:** goes beyond writing code by analyzing the client's business processes to recommend the most efficient automation.
